

## **SYNOPSIS – EVANGELINA** by Tammy Gross

Teenage AUTUMN is sent to highly regarded psychiatrist DON to work through emotional issues brought on by an assault.

In their first session, Autumn senses the presence of an entity named EVANGELINA, who causes Autumn to behave with increasing volatility. Fearing his patient has lost touch with reality, Don has Autumn held for observation and treated for schizophrenia.

When meds cause Autumn to grow numb and isolated, she's powerless to stop her former best friend CHELSEA from dating Autumn's alleged attacker. To make things worse, Autumn's mother MEG starts to fall for Don, leaving Autumn alone and more curious about Evangelina.

Autumn discovers that Evangelina was Don's patient and the victim of an unsolved assault-murder. She looks for clues to Evangelina's murder, and all trails lead to Don.

By the time Autumn convinces her mother that there's cause to suspect Don, it may be too late as Evangelina's murderer has already targeted his next victim: Autumn.
